TABLEAU DE COMPARABILITE

Annual Classification Changes and Year to Year Statistical Comparability

The purpose of these notes is to describe the measures taken to provide for year to year comparability between classes and to outline the reasons for commodity classification changes. In January each year the Export Commodity Classification (X.C.C.) is revised and a number of changes are introduced. These changes take several forms:

1. Certain classes are re-numbered to provide for future expansion of the classification or to indicate a break in continuity in class content.
2. A number of new classes are introduced to permit more precise definition of major commodities moving in trade. This is done by splitting existing classes into one or more new classes.
3. Occasionally, where the volume of trade does not warrant separate classification, classes are combined with other classes or become part of a group residual (n.e.s.) class.

The commodity classification therefore evolves to reflect the changing composition of Canada's international trade and to better meet the requirements of users. An unavoidable by-product of this process is that when the content or numerical designation of commodity classes change it is not always possible to provide, in the framework of a report, comparable data for the previous year's trade.

Modifications annuelles apportées à la classification des marchandises et comparabilité statistique d'année en année

Ces notes ont pour but de décrire les mesures prises pour assurer une comparabilité annuelle entre les classes et d'exposer les raisons qui ont motivées les modifications apportées à la classification des marchandises. On revise la classification des marchandises d'exportation en janvier de chaque année et on y introduit un certain nombre de modifications. Voici les genres de modifications apportées:

1. Certaines classes sont renumérotées pour permettre un élargissement subséquent de la classification ou pour indiquer une rupture de continuité du contenu d'une classe.
2. On introduit un certain nombre de nouvelles classes pour permettre une définition plus précise des principales marchandises vendues sur le marché. Pour ce faire, on divise une classe existante en une ou plusieurs nouvelles classes.
3. Parfois, lorsque le volume du commerce ne justifie pas une classification séparée, certaines classes sont intégrées à d'autres classes ou annexées à la classe résiduelle (n.d.a.) d' un groupe.

Par conséquent, la classification des marchandises évolue afin de tenir compte de la composition changeante du commerce international du Canada et de mieux répondre aux exigences des utilisateurs. Ce procédé comporte un inconvénient inévitable: lorsque le contenu ou la numérotation des classes de marchandises est modifié, il n'est pas toujours possible de fournir, dans le cadre d'un rapport, les données correspondantes pour le commerce de l'année précédente.

In order to eliminate this problem the following measures were adopted:

1. A class for which the code changed in 1979 or 1980 is shown with its current code whether,
 - a) it retained the same content, or
 - b) changed in content.
2. Where a previously existing class was split into several, in either 1979 or 1980 the newly created classes were
 - a) recombined and shown under the code of the previous class, or under the most appropriate current code;
 - b) shown under the current codes where it was possible to make the split retroactive;
 - c) left unchanged when a retroactive split was not feasible and where the new codes were in existence for the two latest years.
3. Where previously existing classes were combined into one, in either 1979 or 1980, the data are shown under the current code.
4. Where changes in class definition and content made it impossible to achieve comparability over time for any of the specific classes involved the commodities concerned were:
 - a) aggregated for each of the 3 years, combined with the appropriate residual class and shown under its code;
 - b) aggregated for each of the 3 years and shown under a "dummy" class code;
 - c) left unchanged where none of the above alternatives was feasible.

Afin d'éliminer ce problème, nous avons adopté les mesures suivantes:

1. Une classe dont le code a été modifié en 1979 ou 1980 est indiquée avec son code actuel,
 - a) que son contenu soit le même, ou
 - b) qu'il soit différent.
2. Lorsqu'une classe déjà existante a été divisée en plusieurs classes, que ce soit en 1979 ou 1980 les nouvelles classes créées ont été
 - a) refusionnées et inscrites sous le code de l'ancienne classe, ou sous le code courant le plus approprié;
 - b) inscrites sous les codes courants, lorsqu'il était possible de donner à la division un caractère rétroactif;
 - c) laissées intactes lorsqu'une division à effet rétroactif était impossible et que les nouveaux codes existaient depuis les deux dernières années.
3. Lorsque des classes déjà existantes ont été fusionnées en une seule, que ce soit en 1979 ou 1980 les données figurent sous le code courant.
4. Lorsque les modifications apportées à la définition ou au contenu d'une classe ne permettaient pas la comparabilité dans le temps pour l'une ou l'autre de ces classes, les marchandises visées étaient:
 - a) réunies pour chacune des trois années, intégrées à la classe résiduelle appropriée et inscrites sous le code de cette classe;
 - b) réunies pour chacune des trois années et inscrites sous un code de classe fictif;
 - c) laissées intactes lorsque ni l'une ni l'autre des deux solutions précédentes n'étaient possibles.

5. Where only class content changed, the original class code was retained.
6. In some instances units of quantity are changed as part of a continuing program to standardize the unit in the various economic statistics published by Statistics Canada. Where such changes took place:
 - a) quantities were converted to a unit common to all the periods covered by this report;
 - b) when conversions were not feasible the original units were retained.

Users should note that the equivalence table shown below is presented in the sequence of the publication code adopted for this report. To that extent the sequence of any of the classifications used in the period 1978-80 is not respected. Besides, any class in existence during that period may be shown in several places in the equivalence table.

In the following table, the number appearing in the NOTE column refers to the type of measure adopted to ensure comparability.

5. Si les modifications ne visaient que le contenu d'une classe, on conservait le code de classe initial.
6. Il arrive que des unités de quantité soient modifiées dans le cadre d'un programme continu pour normaliser l'unité de diverses statistiques économiques publiées par Statistique Canada. Dans ce cas:
 - a) les quantités étaient converties en unités communes à toutes les périodes couvertes par ce rapport;
 - b) lorsque les conversions s'avéraient impossible, les unités originales sont retenues.

Les utilisateurs doivent prendre note que le tableau d'équivalence ci-après est présenté dans l'ordre du code de publication adopté pour ce rapport, de sorte qu'on ne tient pas compte de l'ordre des classifications utilisées pour la période 1978-80. De plus, il est possible que les classes utilisées au cours de cette période apparaissent à plusieurs endroits dans le tableau d'équivalence.

Dans le tableau ci-après, le chiffre apparaissant dans la colonne intitulée NOTE renvoie au genre de mesure adoptée pour assurer la comparabilité.

1. **Sources of Statistics:** Export documents collected by Canada Customs are the basic source of export statistics, except for data on electricity, crude petroleum and natural gas exported by pipe-line. Electricity exports are reported by the exporting firms through the National Energy Board, crude petroleum and natural gas exported by pipeline are reported by companies directly to Statistics Canada.

2. **Coverage:**

a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have since been changed in form by further processing and then exported.

b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or blending are not considered as changing the condition of imported goods.

c. **Total Exports:** These statistics are the sum of a. and b. above.

d. **Exclusions:** The following commodity movements are excluded from export statistics (being however recorded separately as Special Transaction—Non-trade in Table 5): settlers' effects; private donations and gifts; identifiable tourist purchases; goods shipped to Canadian diplomatic or military personnel abroad or by foreign representatives in Canada; temporary exports for exhibition or competition, including films for processing. Bunker supplies and ships' stores sold to foreign vessels or aircraft in Canada, temporary exports (other than contractors' equipment shown under commodity code 970-20) and goods merely moving in transit through Canadian territory are not reflected in any of the statistics.

3. **Commodity Classification:** Commodities are classified to the Export Commodity Classification (XCC), which is based on the "Standard Commodity Classification" (cf. cat. 12-502, Statistics Canada).

4. **Country and area of destination:** Exports are classified to the country to which they are consigned at the time the goods leave Canada, i.e. to the furthest known destination. Statistics are compiled and presented for the individual countries listed on page VIII of this report. Countries are arranged primarily according to geographical location. The "principal trading areas" shown in some tables include groupings which are defined as follows:

Other E.E.C.: Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands. The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

1. **Sources des statistiques:** La statistique des exportations se fonde principalement sur les documents d'exportation recueillis par les Douanes canadiennes, sauf dans le cas des données sur l'électricité, le pétrole brut et le gaz naturel exportés par oléoduc. Les rapports sur les exportations d'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national d'énergie, tandis que les compagnies exportatrices de pétrole brut et de gaz naturel par oléoduc fournissent directement leurs rapports à Statistique Canada.

2. **Couverture:**

a. **Exportations nationales:** La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau puis exportées.

b. **Réexportations:** La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage ou l'assemblage ne modifient pas l'état des marchandises importées.

c. **Total des exportations:** Ces statistiques correspondent au total des valeurs a. et b. ci-dessus.

d. **Exclusions:** Les mouvements de marchandises suivants sont exclus de la statistique des exportations (ils sont toutefois classés séparément comme Transactions spéciales—hors commerce dans le tableau 5): les effets d'émigrants; les dons et cadeaux privés; les achats identifiables des touristes; les marchandises expédiées aux diplomates ou militaires canadiens affectés à l'étranger ou par les diplomates étrangers au Canada; les exportations provisoires pour les expositions ou les concours, y compris les films exportés en vue de leur développement. Les approvisionnements de soute et de bord vendus aux navires et avions étrangers au Canada, les exportations provisoires (autres que le matériel des entrepreneurs, qui apparaît sous le code des produits no 970-20) et les marchandises qui séjournent temporairement en transit en territoire canadien, ne figurent dans aucune statistique.

3. **Classification des marchandises:** Les marchandises sont classées dans la Classification des marchandises d'exportation (CME) qui se fonde sur la "Classification type des produits" (no 12-502 au cat. de Statistique Canada).

4. **Pays et région de destination:** Les exportations sont classées selon le pays vers lequel les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue. Les données statistiques sont compilées et présentées pour chaque pays mentionné à la page IX de la présente publication. Les pays sont disposés surtout selon leur situation géographique. Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

Autres C.E.E.: Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas. Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

Other O.E.C.D.: Austria, Finland, Greece, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of O.E.C.D. — The Organization for Economic Cooperation and Development).

Other America: This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

5. **Quantities:** Tables 4 and 5 show quantities, where available, in terms of the units specified for each class in the "Export Commodity Classification," (cf. above), and defined on page VII of this report. Table 10 shows quantities only where all (or substantially all) of the classes in a group use the same measure of quantity. Measures of weight or volume exclude any packing required for shipment; and "numbers" refer to complete (or substantially complete) units exported, excluding parts.
6. **Valuation:** Exports are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transaction, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.
7. **Abbreviations:** Designations of countries and commodities used in this report are often abbreviated or shortened. A key to abbreviations of countries appears on page VIII of this report and comprehensive descriptions of commodities and commodity groups are shown in the "Export Commodity Classification," (cf. above). The letters "n.e.s." mean "not elsewhere specified".
8. **Treatment of Confidential Information:** It is occasionally necessary to withhold publication of details where commodity or country information is known to involve disclosure. The suppression of commodity-by-country detail, however, affects neither class nor country totals.
9. **Mode of Transport:** Four principal modes of transport are covered in this report:
 - a. Water Transport (includes ship and barge)
 - b. Road Transport (includes truck, car and bus)
 - c. Rail Transport (includes railway express, even if the express company has moved the goods by road)
 - d. Air Transport (includes air express but not air mail)

A fifth designation "Other" covers such movements as pipeline, mail and parcel post and other miscellaneous modes of transport.

Autres O.C.D.E.: Autriche, Espagne, Finlande, Grèce, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. — l'Organisation pour la coopération et le développement économique).

Autres Amérique: Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

5. **Quantités:** Les tableaux 4 et 5 donnent, lorsqu'elles sont disponibles, les quantités exprimées dans l'unité indiquée pour chaque catégorie dans la "Classification des marchandises d'exportation," (mentionnée ci-dessus); les unités sont définies à la page VII de la présente publication. Le tableau 10 indique les quantités seulement là où toutes (ou presque toutes) les catégories d'un groupe utilisent la même mesure de quantité. Les poids ou les volumes sont mesurés nets de l'emballage nécessaire à l'expédition; et les "nombres" représentent le nombre d'articles complets (ou presque complets) exportés sans les pièces.
6. **Évaluation:** Les exportations sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.
7. **Abréviations:** Les noms des pays et des marchandises cités dans le présent rapport sont souvent abrégés ou raccourcis. L'explication des abréviations des pays est donnée à la page IX du présent rapport tandis que les descriptions complètes des marchandises et des groupes de marchandises figurent dans la "Classification des marchandises d'exportation," (mentionnée ci-dessus). Les lettres "n.d.a." signifient "non désigné ailleurs".
8. **Renseignements confidentiels:** Il est parfois nécessaire de supprimer le détail des données relativement à certaines marchandises ou à certains pays pour protéger le caractère confidentiel de données individuelles. La suppression du détail des marchandises par pays ne modifie toutefois pas les totaux par catégorie, ou groupe de pays.
9. **Mode de transport:** Quatre principaux modes de transport sont compris dans le champ du présent rapport:
 - a. Le transport par eau (comprend navires et chalands)
 - b. Le transport par route (comprend camions, voitures et autobus)
 - c. Le transport par chemin de fer (comprend les messageries, même si le service de messageries a transporté les marchandises uniquement par voie routière)
 - d. Le transport par avion (comprend les messageries aériennes, mais non le courrier aérien)

Une cinquième désignation (Autres) comprend les pipe-lines, le courrier, les colis postaux et les divers autres modes de transport.
